Trans. of a [Paper from] Conference on Works Trans-
port [held at] Düsseldorf, 16-18 Oct 56.

DESCRIPTORS: Blast furnaces, *Ores, *Transportation,
Railroads, Shipping, Costs, *Steel industry.

The process of moving ore varies considerably from
works to works. The geographical position of the works
exerts the greatest influence. The older works lie
mainly in enclosed urban districts; streets, railway and
inhabited districts determine the layout of the works rail
system. Unsuitable layouts can result in increased
shunting and additional costs. The varying positions of
the individual sections of the works in relation to each
other, together with the unequal technical efficiency of
